Water is Precious!

What can you do to conserve it and keep it clean?

Sweep up...

Use a broom to clean your driveway or porch instead of a hose. You'll get the benefit of exercise and fresh air while saving water.

Tune up...

Adjust your sprinklers to water your landscape, not the pavement. While you're at it, fix those leaky pipes, faucets and sprinkler heads, to save as much as 20 gallons of water per day.

Cover up...

Just a few inches of mulch will not only prevent weed growth and other pests, but can save 40 gallons of water per day.
